REPLACING YOUR CUSHION COVERS

Your wicker set comes with a set of covers for your cushions that can be removed for washing or to replace them with a 2nd set of covers. Covers are washable and zippered for easy cleaning. You can wash your covers in cold water, but **do not** put them in the dryer. Air drying is recommended.

By following these simple instructions you can avoid tearing the covers or breaking the zippers when replacing them with your 2nd set of covers. Covers are made to fit snug on cushions. **DO NOT PUT 2ND SET OF COVERS OVER COVERS THAT WERE SHIPPED WITH WICKER SET.**

1. Remove covers that were shipped with your wicker set from cushions. Because the cushions fit snug, be careful not to force zippers or pull fabric as this may cause tears or break the zippers.

2. Now that cushions are bare, replace them with 2nd set of covers by gently nudging the fabric up the cushion. Again, be careful not to tug or pull fabric or force zippers.
